Tokyo, Jan. 6.

Driving from north and south along the Tientsin-Pukow Railway, the Japanese forces at both ends of the line are continuing their relentless attacks in an attempt to force Chinese troops out of their strong defence positions in the vicinity of Hsuchow, strategic railway junction city, where the Lunghai line meets the Tientsin-Pukow system.

Two Japanese columns, according to Chinese reports. are driving from the bank of the Yangtwo into the north in an endeavour to occupy the southern partion of the Tientsin-Pukow railway.

The objective of these units is Pengpu, in northern Anhwei, against which the attackers are making a determined march.

The Japanese claim, their troops have seized Kantai, 98 kilometres north-west of Yangehow. As a result of this success the Japanese are said to be within 100 kilometres of Pengpu.-Reuter.

Lunghai Line Objective

Hankow, Jan. 6. Indications are mounting that the Lunghai Railway is the next objective of the Japanese, who will probably simultaneously drive to Hsuchow from both the south and north and also attempt a landing at Haichow to bring the Peiping-Hangehow front closer to Chengehow. The Chinese line south of Shantung at present stretches to Szeschul, Ningyang and Wenshang. SHAKE BRITAIN'S CONFIDENCE IN TOKYO ASSURANCES

Anti-British Sentiments Unlikely To Change With Elevation To Ministry

London, Jan. 5.

The Scotsman, in an editorial, says it is uncertain how much importance should be attached to the Japanese Minister Admiral Nobumasa Suetsugu's bellicose statements. The fact that he was appointed Minister of the Interior shows that his views are not unacceptable in Tokyo official circles. It is unlikely that ministerial responsibility will modify his anti-British sentiments.

Certainly, says the paper, it is disconcerting to find one of the most influential Japanese politicians expressing views so much at variance with the repeated assurances of other Japanese Ministers that Japanese action in China is not motivated by antagonism to the foreign Powers, and that there is no intention of interfering with their interests. Still less confidence can be placed on these assurances after the Japanese demands to the Shanghai Municipal Council.

CHINESE LODGE PROTEST

Object To Giving Over Prisoners To Japanese

Hankow, Jan. 6. requested the British, French American governments to take ones, accompanied by notes on the prompt measures to prevent enforce- efficiency of the Council administrament of the Shanghai Municipal Council's proclamation of January 1, giving the police emergency powers as a sequel to bomb-throwing incidents in the Settlement.

The Foreign Office strongly objects to the provision for making offenders against armed forces in the Settlement liable to be handed over to the forces concerned, and states that the Chinese Government reserves all rights possessed within the Settlement, and would regard as illegal the delivery to non-Chinese armed forces the of anyone over whom the Chinese law courts exercise jurisdiction.

China has also sent a note to Tokyo protesting against the alleged intimidation of Chinese Consular officials in Korea who refused to acknowledge the so-called Provisional Government of Pelping.-Reuter.

The paper regards Admiral Suctsugu's insistence yesterday, that he-was-speaking-as-a-private_individual and not a Minister of the State, as a naive distinction which is meaningless. Admiral Suctsugu's indiscreet utterances recall the Tanaka Memorial Plan of 1927, whose authenticity Japan denied, but which, although it seemed extremely audacious at the time, has been largely carried out.-Reuter.

Early Press Comments London, Jan. 5.

Reactions to the interview with Admiral Suctsugu and the Japanese demands in Shanghai mutually compete for general attention here. The Shanghai demands especially are The Chinese Foreign Office has given prominence in papers of every and complexion, including the popular tion and the Police and the appailing problem presented by millions of refugees in Shanghai and Japanese inability to prevent outrages in the areas they themselves control. Once upon a time Paris was not enthusiastic about catering for our needs in this direction, but this season designers have excelled themselves. An elegance of detail and trimming is the keynote.

I noticed one particularly smart dress with no ornamentation of any kind except that down the front, in place of the usual rather large buttons, were three miniature umbrellas.

In addition, designers have borrowed many evening materials and made them up in plain tailored dress styles.

Taffetas, for instance, are particularly adaptable for the season's skirts, which are slowly but unmistakably getting shorter and shorter.

Silver or gold threaded fabrics

that are a subdued version of the sparkling evening lamés appear in demure styles, while the clinging qualities of supple slik Jerseys render tliem most suitable for cunningly draped bodices and that front fullness on skirts. Practically every style is sheath fitting to below the walst, so that we

cannot afford the slightest wrinkle in our foundation garments. Necklines for the majority remain high, but transparent vokes or inserted motifs of net or chiffon, as well as delightfully attractive handwork, mo-

mentarily break this rather Our artist has sketched four typical · frocks litustrating fashion points from the mid-season's collections. Lace insets and tiny frills break the sleek line of the left-hand model.

The trio (mset) includes a new 'tunle cut high to throat in front'and with a V back. The style has an edging of broderle anglaise.

The trimming fashion is carried a stage farther in the centre figure; * heavy wool embroidery is shown on the rounded bodice which is in a darker tone to the rest of the frock. Stripes go round and round in the

"Not Surprising"

The influential Yorkshire Post states that from the outset of the Japanese invasion the Powers must have foreseen that the Japanese would seek one means or another to obtain possession of the International Settlement, which apart from the intrinsic wealth, holds the key to trade and finance of the Yangtse. Hence there is nothing surprising in the Japanese charge of lack of efficiency of the Settlement police, though, as all the world is aware, the charge is a monstrous perversion of

the facts. "If the Japanese," the paper continues," expect that economic exploitation of China can be ensured by brute force, they are destined eventually to be undeceived at great cost to themselves. DEGREES CONFERRED AT UNIVERSITY

High Tributes Paid To Past Vice-Chancellor

The twenty-ninth Congregation of the Hongkong University for the conferring of degrees was held yesterday when His Excellency the Governor, Sir Geoffry Northcote, acted for the first time at this function in his espacity of Chancellor.

Mr. D. J. Sloss, C.B.E., M.A., referred to the lack of a hostel for the girl students, who had increased in numbers, and the insufficiency of playing fields generally. In a generous tribute to his predecessor, Mr. Sloss mentioned that a considerable number of books had been donated to the University by Sir William Hornell.

The Chancellor made a studied reference to the deliberations of the Committee which recently published recommendations for changes in the University administration, but laid most stress on the need for greater attention to the teaching of. hygiene and the need for accommodation for girl students.

Students' interest in games is maintained, but is limited by insufficiency of playing grounds. This applies particularly to tennis. I therefore, the more grateful to Mr. Eu Tong-sen for his gift to provide a new tennis court, and to Mr. Sum Pak-ming who has agreed to bear the cost of adapting the basket-ball court that he gave so that it may be used both in that game and as a tennis court. Mr. Eu Tong-sen's gift was the more welcome as it was entirely unsolicited and arose out of his interest in students' games. He has already given a gymnasium, which is a good deal used, but still is by no means used to the fullest extent. (Applause).

Sir William's Gift

The General Library of the University has been enriched by a gift of about 2,000 volumes from Sir William Hornell. Many of the books in Sir William's gift would now be diffleult to obtain, and they increase the value of the Library. The Chinese Library has also found friends, Two large collections of good books, some in rare editions, have recently been lent from Canton for long periods of use in this Library. after those distinguished years in India. The history of this University has been a story of transitions from crisis to crisis, and Sir William Hornell's days were not peace, butsince I came here, I have never heard a word of criticism that did not begin by assuming Hornell's zeal for sound University standards and his unfailing goodness of heart. GASTRIC ULCER "NEARLY COST ME MY LIFE"

The hours and duties of a rallway worker tend to make him liable to stomach trouble. Mr. B., a Railway man, suffered from a gastrio ulcer which, he says, " nearly cost me my life." He had X-rays, an operation, and was strictly dieted for months, yet still his pain returned, his appetito falled, his work almost got beyond him.
Now read what he writes:

It is not for me to try to estimate ... I decided to try Maclean Brand the work that he did in Hongkong Stomach Powder and I never had the pain again. Now I can eat anything that comes along, but I always take your Powder after cating. I take it to work with me and am hever without it."

Sir William Peel drew attention to this need in his Chancellor's speech in 1933, and the state of many parts of Victoria cannot be said to be better to-day than was the case then; indeed, so far as over-crowding goes it is considerably worse, while in the country villages human existence is carried on with little or no knowledge or consideration of the basic rules of hygiene. There can be no study of greater value to living men than how to live healthly, and to that end it is necessary that in every community there should grow up a universal awareness of the fundamental importance of nutrition, housing, town planning, sanitation and so forth. There can be little placing censors in the cable offices of the Settlement than in cable offices in any other neutral port. Moreover, the Settlement itself established censorship in 1932, and as far as Hongkong authorities are aware that system was still in operation when the Japanese usurped the responsibility of authorised officials.

Meanwhile, because the Telephone 28021. Japanese censors walked into the Chinese radio offices and the staffs walked out, the twelve Shanghai wireless stations are silent. This throws an additional burden on the cable companies, and already they are burdened enough, what with faulty connections and no cable ship yet available to effect repairs. The ship is on her way, however.

The Film Society has produced a dramatic and terribly ironic documentation of the Italian invasion of Aby-

It has been achieved by dovetailing the official film glorifying Italian arms under the title of "The Path of the Heroes" with a film made by two Russian cameramen on much more simple lines and bearing the title "Abyssinia."

Having been shown in the Russian picture something of the pence-time lives of the amiable and placid Abys- | sinians, we pass to an elaborate · Italian sequence and see the tremendous concentration of activities in preparation for the campaign.

"Confident of its courage and conscious of its civilising mission," says the Italian commentator, the force

moves on. "OXYGEN OF CIVILISATION"

And then, disturbed by the scope and immensity of these wonderfully organised preliminaries, we are taken back to Abyssinla to observe, incidentally, the calm dignity of the Emperor and to contemplate with dismay the pitifully inadequate resources of the coloured warriors as they mobilise to meet a fee of whose strength and remorselessness they can have little conception.

There follows more of the Italian might, bringing inexorably nearer; to the Abyasinians what the supercharged commentator calls "the oxygen of civilisation necessary to enable their lungs to breathe more

INDIAN CONGRESS ALARM AT UNREST

The Central Executive of the Congress party is becoming increasingly plarmed at the spread of agrarian and industrial unrest. According to the political correspondent of the Times of India a political crisis of a serious nature is fast developing.

The actions of the governments in Congress-ruled provinces are loudly criticised not only by Communists moderates. They say that they are similar to those of past governments. The activities of students, coupled

with the unrest due to unemployment, are causing anxiety. Members of the Congress Central Executive are demanding an early meeting to review conditions.

50,000 Pctitions.—A number of bullock carts, escorted by Congress volunteers and surmounted by red flags bearing the hammer and sickle device, have unloaded 50,000 petitions outside the Patna house of Mr. | Sinha, Premier of Behar. MANY PLAYERS SELECT THEMSELVES AUTHORITIES OUGHT TO SHORTLY

Now that the replay between the Services and the Civilians has been decided, and in view of the fact that some of the best players in the Colony were on view in the two matches played between these two sides, I take this opportunity of nominating my Interport team.

With the exception of the righthalf berth, I find it sufficient to go no further than the Services' and Civilian elevens for my nominations. I feel that Ray (Army) and Brown (Civilians) are not the two best right half-backs in the Colony; there are other's whose claims have to be taken into consideration.

My Interport selections are as follows: Goal - keeper. - M. Ramzan (K.I.T.C).

Backs.-Wallace (R.A.F.) or A. E. P. Guest (Radio), and E. L. Gosano

PLAYING AT CRICKET ONLY FOR THOSE WITH A LOVE OF BON HOMIE

It was a dark and stormy night and the brigands were gathered round the camp-fire. And one of them said, "Come, Nick and make us a game at wickets". And so it came to pass. At the moment it escapes me whether the camp-fire was in the Bowling Alley or in one of H.M. Ships but the only thing that matters is that the match took place on Sunday last at King's Park, being played between a few of the Gentlemen of Hongkong and a few of the Gentlemen of the Navy. It was, in the programme described as a Glass of Cricket, and the hours of play depended mainly on J. Coates-(who once qualified for Pennycomequick or some adjacent borough)-and the weather. The latter was definitely dry. .

TABLE TENNIS CHAMPIONS

May Play Here Shortly

"If arrangements proceed as anticipated, Hongkong will have an opportunity of witnessing Miklos Szabados and Istvan Kelen, the Hungarian world champions at table tennis, in action next March. These two champions arrived in the Colony a few days ago on board the steamer Nellore from Australia, on a visit to

Both expressed surprise when in-Pearce, H. Owen. Hughes, R. L. D. formed that there was no table tennis association in the Colony. Everywhere else they have been, they have been met by a representative of such an association. In Australia, where the game is but a year old, though the standards are medium compared with those of England and Europe, the game has gained such a hold that the country will, in the future, be ranked among the major nations.

Many people, the champions said, have a wrong conception of the game. To play it one must be as fit as for a game of tennis or soccer. A-keen-eye, and above all concentration on the ball, are main essentials, and to have these attributes is not easy.

Having started playing at the age of tourteen, their first world championships were in 1929, when Kelen won the Mixed Doubles title, and together with Szabados the Men's Doubles. Szabados that year was runner-up to Fred Perry in the Singles. They are the present holders of the Australian Singles and Doubles Championship titles, while Kelen is co-holder of the newly inaugurated Mixed Doubles championship.

They expressed their willingness to give an exhibition in Hongkong upon their return from Japan early

VERY TENTATIVE

New York, Jan. 5. Business circles regard President Roosevelt's budget message as very tentative and subject to wide revisions, especially in items of relief, taxation, revenue and national defence, which depend on the development of business and international affairs.

As budget deficits are bound to remain to some extent, it is felt an inflationary linge to the budget cannot be denied. It is nevertheless realised that no further Treasury borrowing is being contemplated in the near future since the deficits will be financed by social security receipts. The proposed espitalisation of the Commodity Credit Corporation, with authority to issue its own securities, is regarded as providing a convenient medium for Government spending without directly increasing the national debt .- Reuter.

Mary Grace's Fashion News

EA time is an important time of day in the English home, and perhaps that is one of the reasons why afternoon frocks play such a large part in the average wardrobe.

Once upon a time Paris was not enthusiastic about catering for our needs in this direction, but this season designers have excelled themselves. An elegance of detail and trimming is the keynote.

I noticed one particularly smart dress with no ornamentation of any kind except that down the front, in place of the usual rather large buttons, were three miniature umbrellas.

In addition, designers have borrowed many evening materials and made them up in plain tailored

dress styles. Taffetas, for instance, are particularly adaptable for the season's skirts, which are slowly but unmistakably getting shorter and

Silver or gold threaded fabrics that are a subdued version of the sparkling evening lamés appear in demure styles, while the clinging qualities of supple silk jerseys render them most sultable for cunningly draped bodices and that front fullness on skirts.

Practically every style is sheath fitting to below the waist, so that we cannot afford the slightest wrinkle in our foundation garments.

Necklines for the majority reyokes or inserted motifs of net or chiffon, as well as delightfully attractive handwork, momentarily break this rather

Our artist has sketched four typical frocks illustrating fashion points from the mid-season's collections. Lace insets and tiny frills break the sleek line of the left-hand model.

The trie (inset) includes a new tunic cut high to throat in front and with a V back. The style has an edging of broderic anglaise.

The trimming fashion is carried a stage farther in the centre figure; heavy wool embroidery is shown on the rounded bodice which is in a darker tone to the rest of the frock. Btripes go round and round in the third frock, of taffeta, which sports an umbrella skirt.

WAR-TIME TRANSPORT By A Shipping Correspondent

The Leviathan has had chequered history. Built in Germany as the Vaterland, she went into service in 1914 and made several voyages before the outbreak of war caught her in New York. There she lay until April, 1917,

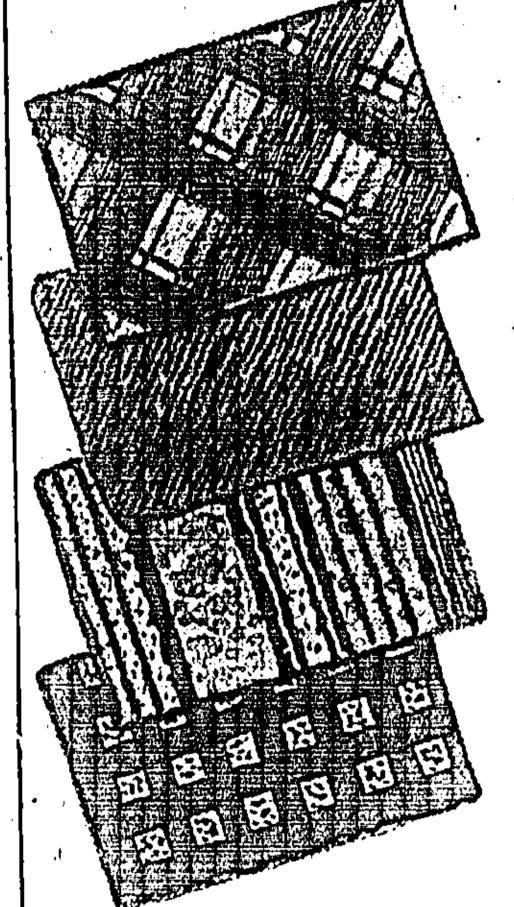

when, on the United States' declaration of war, she was taken over by the authorities and fitted out as a transport. She carried large number of American troops to Europe. After the war she was reconditioned at great expense and put on the North Atlantic passenger service under the management of the United States Shipping Board. She never paid her way and a few years ngo was laid up.

When the Leviathan was overhauled after the war, it was claimed that her gross tonnage had been raised to 59,957 tons, which would have made her the largest ship in the world at that time. Actually, however, she was outclassed by the Majestic, whose displacement—total weight of ship was nearly 1,000

Last night's minimum temperature | ducing friendly co-operation." was 53 degrees, compared with a minimum of 65 degrees a week ago. For the 24 hours ended at 10 a.m. today the temperature did not rise above 66 degrees. Humidity at 10 a.m. was 75 per cent, compared with 85 per cent, a week ago.

Fresh north-easterly winds should ensure a continuance of ideal conditions for the next 24 hours. The official forecast, Issued by the Royal Observatory at 10 a.m., predicts fair

weather. No rainfall has been registered since yesterday morning.

EMPLOYMENT GAINING IN GREAT BRITAIN

London, Jan. 5. The Minister of Labour estimates that at December 13, 1937 the number of insured persons in employment in Great Britain, exclusive of persons within agricultural scheme, was approximately 11,437,000. This was 136,000 less than the month before, but on comparable basis 200,-000 more than the year before. A substantial part of decline was due to severe weather on the day of the count which interrupted ouldoor occupations.

· At the same date the numbers of registered unemployed totalled 1.005,-407, comprising 1,283.604 wholly unemployed, 324,779 temporarily laid off, and 57,024 normally in casual employment. This was 166,204 more than a month before. As compared with the year before there was on a comparable basis, a decrease of about 51,000 in the numbers wholly unemployed, including caquals, but an increase of about 143,000 in the numbers temporarily laid off. Finance Minister Asks Public To Support Army

Tokyo, Jan. 6. Stronger support from the whole nation for the Government's financial policy in order to achieve the objective of the current hostilities, was urged by the Finance Minister to-day in a message to the people of Japan. "The nation behind the guns should leave nothing undone to cope with the situation arising from prolonged hostilities, especially in giving strong support to the Government's policies

for financing our military operations," Pointing to the various problems at home and abroad with which Japan is confronted, the Finance Minister emphasised the necessity for "spiritual mobilisation" to bring about a satisfactory solution. He then volced the hope that the military operations of the Japanese forces would be crowned "with success in glorious victory."-

PACIFISM PLEA

An Issue For The Individual, Says Mr. Spreckley

International friendship and understanding on the basis of humanity's equality was advanced by Mr. David Spreckley, Hon. Secretary of the Hongkong branch of the Peace Pledge Union, when he spoke yesterday at an international tea party arranged by the P.P.U. in Lanc-Crawford's "Peacock Room".

Mr. Spreekley argued that pacifism was a subject for the individual, and it was the individual's attitude to, and his relationship with, his fellowman which must determine the issue between peace and war. They in the P.P.U. were convinced that nationalism, which carried with it the idea "My country, always right", was wrong, for it precluded the chances of understanding the other person's point of view.

They were convinced that war could never bring about peace, because it was not possible to produce good from evil by the use of more Mr. Tham Yat-cho (Per M.O. evil. Mrs. V. C. Labrum presided over the gathering which was well attended by several nationalities. After Mr. Spreckley had outlined the ideals of the P.P.U., he faced a barrage of

questions, tackling them resolutely. During the tea the hosts and their guests discussed the many problems which are conflicting in the minds of all thinking people to-day.

The P.P.U. hopes to arrange further gatherings of this nature in the immediate future.

Utilities and oils moved within a narrow range, but several held small gains. Coppers, chemicals and forms were steady. Tobaccos were strong. Bonds were irregularly lower, but Government issues were higher. Curb stocks were irregular or tablets). higher. Curb stocks were irregular or tablets). and the market was quiet.

Wall Street Journal morning com-The Journal says that yesterday's buying orders came largely from public interests, with professional traders doing little business.

Brokers said that most of the buying of railroad stocks was probably due to short-covering and that some traders are switching from railroad stocks into steel and airplane-manufacturing issues.

It is generally believed that the American Telephone & Telegraph Company will maintain its present dividend.

The current bullishness is due to President Roosevelt's indications that Federal spending will be increased. Crude oil production, as issued by the Petroleum Institute, for the weekended January 1, totalled 3,436,000 barrels, against 3,493,000 barrels the

previous week. Electricity production during the same period, according to the Edison Electric Institute, amounted to 2,000,-000,000 k.w.h., a decrease of 3.3 per cent, as compared with the corres-

ITALY, AUSTRIA AND HUNGARY CONFER

Budapest, Jan. 5. It is semi-officially announced that important talks between Italy, Austria and Hungary will open here on

Count Ciano, Dr. Kurt von Schuschnigg, Dr. Schmidt and Dr. Kanya will participate in the conversations, which are expected to last three days. -Reuter Bulletin.

OBJECT OF TALKS

Rome, Jan. 5. It is understood the principal sub-Ject of the Italo-Austrian-Hungary talks at Budapest will be the Italo-Jugoslav trade treaty signed in March, 1937. The Italian view is that the concessions then made in Yugoslavia's favour are now burdensome and unnecessary in view of the economic recovery of Austria and Hungary .-- Reuter Bulletin.

Hsuchow Objective Of Invaders After Pengpu Is Captured

Shanghai, Jan. 6. Driving from north and south along the Tientsin-Pukow Railway, the Japanese forces at both ends of the line are continuing their relentless attacks in an attempt to force Chinese troops out of their strong defence positions in the vicinity of Hsuchow, strategic railway junction city, where the Lunghai line meets the Tientsin-Pulcow system.

Two Japanese columns, according to Chinese reports, are driving from the bank of the Yangtze into the north in an endeavour to occupy the southern portion of the Tientsin-Pukow railway.

The objective of these units is Pengpu, in northern Anhwei, against which the attackers are making determined march.

REASONS GIVEN

Below I give my reasons for my selections and put forward my suggestions for a Rest team.

THE FORWARDS. Of the forwards, I have given S. A. Fowler preference over Khuda Bux. Though the Indian is faster on Saturday with the following on the right wing, the former plays games: more brainy game and is more experienced. Gurbachan Singh, at in- St. Andrew's v. Hong Ladies side right, is as fast as Sawal Khan and his stickwork furthermore is much better. He formed a grand combination with Fowler on the Seaforth Ladles v. Recreio Civilians' right flank last Sunday. To Pritam Nath, I have given the St. Andrew's v. C.B.S. "B" all-important task as leader of the attack. He does not display the C.B.A. floshy stickwork of Pyara Singh, but the feeding of his forwards has always been his strong and unselfish i asset. The inside left position has been a problem. Pinto, Gopal Ram. Bickford and Nernin Ram are not capable of filling this goal-scoring berth, and my choice is Pyara Singh. He has played in this position before and in the present circumstances is the ideal man. V. Bond has shown a marked improvement as a left winger and though Partnub is more spectacular, his selfishness has been his greatest falling. Bond sends the ball into the centre at the correct moment and his reverse stickwork is quite

It was a dark and stormy night and the brigands were gathered. round the camp-fire. And one of them said, "Come, Nick and make us a game at wickets". And so it came to pass. At the moment it escapes me whether the camp-fire was in the Bowling Alley or in one of H.M. Ships but the only thing that matters is that the match took place on Sunday last at King's Park, being played between a few of the Gentlemen of Hongkong and a few of the Gentlemen of the Navy. It was, in the programme described as a Glass of Cricket, and the hours of play depended mainly on J. Coates-(who once qualified for Pennycomequick or some adjacent borough)—and the weather. The latter was definitely dry.

TABLE **TENNIS CHAMPIONS**

May Play Here Shortly

If arrangements proceed as anticipated, Hongkong will have an opportunity of witnessing Miklos Szabados and Istvan Kelen, the Hungarian world champions at table tennis, in action next March. These two champions arrived in the Colony a few days ago on board the steamer Nellore from Australia, on a visit to

Both expressed surprise when inassociation in the Colony. Everywhere else they have been, they have been met by a representative of such an association. In Australia, where the game is but a year old, though the standards are medium compared with those of England and Europe, the game has gained such a hold that the country will, in the future, be ranked among the major nations.

Many people, the champions said, have a wrong conception of the game. To play it one must be as fit as for a game of tennis or soccer. A keen eye, and above all concentration on the ball, are main essentials, and to have these attributes is not easy.

Having started playing at the age of lourteen, their first world championships were in 1929, when Kelen won the Mixed Doubles title, and together with Szabados the Men's Doubles. Szabados that year was runner-up to Fred Perry in the Singles. They are the present holders of the Australian Singles and Doubles Championship titles, while Kelen is co-holder of the newly inaugurated Mixed Doubles championship.

They expressed their willingness. to give an exhibition in Hongkong upon their return from Japan carly

White House officials indicated to-day that President Franklin Roosevelt is about to give the "Go Ahead" signal for the expanded naval construction programme.

They stated that the President called to the White House congressional leaders, Mr. Charles Edison of the N.R.A., and Admiral Leahy.—Reuter.

FAITH IN INDUSTRY

Washington, Jan. 5. President Roosevelt's mussage to Congress, veering away from public works and Civilian Conservation Corporations as methods of solving the unemployment problem, is regarded in political circles as affirming the hope that private industry may take up the slack in employment. With additional relief measures possible, the re-armament programme is seemingly held in reserve in case recession becomes worse. While the President does not specifically link the possible re-armament programme with re-employment measures, wellinformed circles interpret this phase of the budgetary position as follows:

MARCIN FOR ARMS If, through Government co-opera- | flying boats, one of which has already tion with business, joint measures to visited Australia on an experimental halt recession are successful, relief flight, will be placed in service beexpenditure can be further cut, leav- tween Southampton and Singapore ing the margin available for arms within a few weeks. expenditure should the international When these flying boats are used situation, especially in the Far East, on the Singapore route, a new timeshow no improvement. have about reached their limit of present usefulness. Hence, whatever the coming year has in store, authoritative circles believe expenditure on defence is certain to show a continued upward

curve.-Reuter. NEW CUILDING PLAN

PREDICTED

Washington, Jan. 5. Hints given by congressional leaders and naval officials, who interviewed President Roosevelt, to-day, indicate that the message, which it is understood the President will shortly send to Congress, will ask for a basic new warship building programme for years to come, to replace the 1934 Vinson Trammell Act, in which the programme laid down was based on the Washington and London naval

Thus, if the new programme is adopted, the United States will follow the lead of other nations and abandon the yardstick limitation system laid down by the treaties.

Although it is stated that no deci- Hankow .-- Reuter. sion has been reached on the types or numbers of additional vessls, Admiral Leahy, chief of Naval Operations, indicated that the navy favoured one or more battleships beyond the four -at-present-being-built-or-projected, as well as two additional aircraftcarriers and many small cruisers .-

STEEL INDUSTRY BOOMING

More Income For Workers

London, Jan. 5. According to a statement by the British Iton and Steel Federation, the British steel industry is at present equipped to produce, and is producing, at an annual rate far in excess of 1929 or of any previous year. The output of steel ingots and castings for 1937 is 12,000,000 tons representing a stepping up by 3,000,-000 tons in the last two years and comparing with 9,600,000 tons in 1929. The process of scrapping and reconstructing older plant and of extending large scale integrated works has been proceeding rapidly over the past few years. At the year's end aggregate steel furnace capacity of country stands at 13,500,000 tons per annum, which compares with 12,-750,000 at the end of 1936 and appoximately 11,000,000 tons at the end of 1929. It estimated the industry has spent £20,000,000 in new and reconstructed furnaces, mills etc. in the two years ended to date. In 1920 new capital expenditure was £2,300,000.

The industry's programme of re-equipment is not yet complete. Work is proceeding on large projects in South Wales, on the Clyde, in Lincolnshire and elsewhere, and these, it is estimated, will in-volve a further expenditure of over £10,000,000 in the course of 1938. By the end of this year steel-making capacity will have been further enlarged to rather more than 14,000,-

000 tons per annum. Record netivity has involved a record volume of earnings in resnect of Iron and steel workers. It estimated the total earnings paid in 1937 amounted to £49,000,000 which compared with £41,000,000 in 1930 and £38,000,000 in 1929. Over some period the percentage of insured synrkers employed has risen from 80.7% in November 1930, to 80.4% in November 1937, and the average carnings per week have advanced from £3, 10s. 7d to £3, 17s. 6d. OUTLINES EDUCATION PROGRESS

Striking Figures Of British Expansion

London, Jan. 5. Mr. Kenneth Lindsny, Parliamentary Secretary to the Board of Educa-non in his presidential address to the North of England Education Conference at Scarborough to-day ac-scribed the progress which has been made in the urban and rural districts with the re-organisation of schools, resulting in the provision of liberal and practical education suited to the larging needs of boys and girls over 11 years of age.

Between Apr.l and November 1937 the Board approved of over £6,500,-000 for capital expenditure mainly in connection with re-organisation—an nerease of one million pounds over last year's figures. Plans for fur-ther work estimated at £13,000,000 are now in an advanced stage of consideration.

INTANGIBLE RETURNS In his concluding passages, Lindsay SATURDA turned to consider the intangible re-'urns which the nation derived from' great expenditure on education. He | said the real fruits educated demorracy reaped from its educational expenditure - kindliness, tolerance, vitality and appreciation of beautydid not yield to statistical measure-

ment and often went unremembered. "Tolerance and truthful dealing between peoples s ill matter," he said. "Care for the weak and oppressed is still a virtue. If Great Britain stands for these things in the world-nnd nothing could be less nggressive-it is to the schools that we must look their preservation."-British

Taking Stock Of Her Position

Washington, Jan. 5. The Senate has passed the Stelwar Flying boats will considerably re- Bill calling upon the State Departduce the transit time between both ment to provide information as to the extent of American capital invested, civilian nationals and army and navy men present in China at the present time. There have been protests that the time was inopportune for the disclosure of such

information. One highly-placed Congressman stated: "We have the same obligations to a single American as to 100,000. It would be most unfortunate to interject the idea that our position in China is to be determined by the number of our nationals or the size of our 'stake' there."

Senator William Borah said the resolution did not imply that Americans ought to leave China. Senator Stelwar consented to an amendment that the State Department reveal only what was possible without hurting national interests. Senator Lewis, of Illinois, recalled he had repeatedly urged withdrawal of armed forces from China lest a elash involved them in war. now such an incident has occurred that they cannot be withdrawn. It

would be a form of treason." Senator William Nye presented the Department of Commerce report showing that \$132,000,0000 (U.S. currency) was invested in China, and \$60,000.000 in Japan, excluding American loans.-United Presss.

U.S. MAY BUY LESS SILVER

Washington, Jan. 5. President Roosevelt, in his budget survey, obstensiby indicated that the Treasury expected to purchase a smaller amount of silver during the fiscal year of 1939 than in 1938, but only slightly under the 1937 figure. This indication is derived from the fact that President Roosevelt estimated the Government's silver

seignorage receipts would be \$35,-000,000 compared with \$60,000.000 in the current fiscal year and \$39,000,-000 in the previous year. However, it is pointed out that these estimates are sometimes changed. In January 1937 the President's

estimate of seignorage for the current fiscal year was \$40,000,000 whereas at present it is estimated it will amount to \$60,000,000. It is believed the difference is due to shifts in the Treasury purchase policy in accordance with expenditures as the fiscal year develops.-United Press.

REMINDER TO RUMANIA

London, Jan. 5. Sir Reginald Hoare, British Minister at Bucharest, has been instructed to remind the Rumanian Government's long-standing interest in the Minoritles Trenty signed in Paris on December 9, 1919, to which Rumania way one of the original signatories, and in the minorities procedure generally. France is reported to have acted similarly.

The Minorities Trenty guaranteed racial, religious and linguistic freedom, the provision of schools and the use of their language in the Courts and in dealings with the authorities. at 1 and 3, Wyndham Street in the City of Victoria, HongkongReuter Special.
